## Taidot

Biogas plants

Solarenergy

Solarpanel installation

First aid

Leadership

Design

SolidWorks

SiemensNX

Autocad 2D ja 3D

## Languages

Finnish - Native

English - Excellent

German - Basics

Swedish - Basics

# Matias Saarinen

I am a 29-year-old energy and environmental engineer and I am looking for a full-time job that matches my skills. In addition to my expertise in energy technology, I have comprehensive and up-to-date knowledge of all the basic skills of a technical engineer. In my studies I focused on many different studies that support work management and design work. My thesis dealt with the maintenance of small biogas plants.

In my hobbies I am often in a leadership position helping others. I have worked, among other things, as a responsible tutor, scout leader and 4-H leader. I also own a 3D printer and I design many of my personal projects with Solidworks.

### ■ 9/2025- Barona/Martela Mover

After graduating, I have worked as a mover for Martela through Barona. The moves are corporate moves that require physical fitness and precision. Through my social nature and sense of duty, I am often in contact with the customer, even though I am just an ordinary mover among others.

### ■ 5/2021-1/2023 Solnet Finland Oy Solar panel installer

I worked as a solar panel installer in various parts of Finland. The installation sites were mainly large installations of over 100 kWp. The work was mobile and the work sites could change almost every week. The work sites themselves were often construction sites, where I attended several site orientations.

I often worked on sites as a person of trust, who could be entrusted with responsibilities outside of the job title if necessary, such as receiving goods or supervising the site when the site manager was unable to attend. Due to the size and nature of the company, I also got to know the company structure and the industry in more depth on several levels.

### ■ 6/2011-9/2020 Posti/LSTJ Delivery person/postman/rush hour assistant

I signed my earliest employment contracts when I was 14. I have worked in many different positions during this period, mainly in summer jobs, as a winter assistant or as a temporary worker. With this I would like to emphasize that I am not alienated from working, but rather have extensive experience in working for my age.
